

SureColor SC-T7200 MFP

DATASHEET

The SureColor SC-T7200MFP maximises performance in busy graphics, CAD and GIS production environments. The integrated 36-inch scanner and fast print speed meet the market's need for maximum productivity. Epson's PrecisionCore TFP printheads do not need replacing and, together with UltraChrome XD ink, deliver the highest level of performance, value and versatile media support.

Ideal for graphics, CAD and GIS

This is one of the SureColor SC-T series of high-speed, four-colour large-format printers, designed to produce a wide range of high-quality graphics, CAD and GIS applications in design, commercial print, copy shop, architecture, building, engineering, retail and education environments.

Highly productive

To maximise productivity the printer features large-capacity ink cartridges and high-speed scanning and printing. The integrated 36-inch colour scanner lets you digitise large-format copies (from tracing paper to 1.3mm board) and scan-to-file/email or share with other SC-T printers. Scan to print an A1 original in about 39 seconds

Fast

It features 1GB of RAM for ultra-fast image processing, and an optional 320GB HDD for job caching and recall. Optional PostScript support with dual 1.6GHz CPUs enables printing of large data-rich files quickly and directly from leading design and CAD programs.

High quality output

The combination of Epson's PrecisionCore TFP printheads and UltraChrome XD pigment ink delivers industry-leading output quality and precise, repeatable performance. UltraChrome XD pigment ink is smudge and water resistant and delivers deep blacks and crisp, dense lines — ideal for technical graphics — and the vibrant colours necessary for high-quality prints and posters, on coated and non-coated media — including board up to 1.5mm thick.
