

Korejet Pro Lustre Photo Paper

Our Pro Lustre is a traditional inkjet photo paper. It is a microporous coated paper with a white and beautiful lustre-gloss surface. The photo paper is great for digital printmakers and is suitable for use with all aqueous inks. It delivers highly saturated prints by offering maximum ink coverage and a high D-Max for true photographic reproductions. With exceptional tonal range reproduction, it is perfectly able to reproduce those subtle shades in your image. Its 10-mil RC base gives prints a photographic feel and the lustre surface reproduces the finish that has been traditionally favoured by professional photographers.

Korejet Pro Lustre is offered in sheets and rolls up to 60" wide

- AQUOUS INK
- (ECO)- SOLVENT
- UV-CURABLE
- LATEX

Paper Specification

Weight	g/m ²	246	±	6
Thickness	µm	245	±	6
CIE whiteness	>	136

Media Handling and Printing directions

Where possible, all paper should be stored and used within the following range of environmental conditions. Use and store ideally at a relative humidity of 30 to 70% and a temperature of 10 to 35°C. All recommendations and product indications are for your guidance, and are subject to our test criteria, which remain subject to change without prior notice. Unused paper should be stored in its original packaging, out of direct sunlight under normal climatic condition. Use care in handling printed material, surface susceptible to abrasion. Store papers in archive quality envelopes, folders, and boxes. Use only archive grade tapes and glues for mounting & framing.
